

## Education and Outreach Report – June/July

I have been helping ALMS with their monitoring on Long and Narrow lake and Nature Alberta with their Bio-Blitz in Athabasca. Both times as a plant expert and both times I gave an interview to the Athabasca Advocate.

We hosted the second in person **IWMP meeting** in Fort McMurray. Petra was the lead on that.

I have been updating our website and fixing errors, while organizing the printed outreach and the office.

I gave a presentation to Westlock Town council supported by Janet and Brian, June 25<sup>th</sup>, 2018. On July 10, I gave a condensed presentation to Wood Buffalo Municipality, again supported by Brian and Janet.

I attended the WPAC Summit in Peace River with Janet and Brian.

I focussed my attention on the collaboration with the other Outreach Coordinators and we had several meetings outside the program. I believe that more collaboration between the WPAC can make us all stronger, especially the northern WPACs.

I really enjoyed the presentations, I learn a lot and made great connections. What I take away from the Summit, is the many opportunities for collaboration and sharing of knowledge.
