

**Science Outreach – Athabasca
presents...
Cow patty critters and how
they are affected by
parasiticides applied to cattle.**

**Speaker: Dr. Kevin Floate,
Research Scientist,
Insect Biocontrol,
Agriculture and Agri-Food Canada
Date: Tuesday, March 28, 2023
Time: 7 PM**

**Please join the virtual session
below:**

This presentation provides a general overview on the biology and ecology of insects that breed in cattle dung. This includes a description of the different groups of insects that form the cow dung community, the ecological services that this community provides, and factors that affect community composition. Studies that assess the non-target effects of drug residues in dung of cattle treated with veterinary parasiticides are discussed.
